

AuthGate

## **AuthGate - Secure Okta Client Usage Instructions**

Thank you for choosing AuthGate, a secure and powerful Okta-integrated GUI client.

Please follow the steps below to install and use the product on your system.

AuthGate

## System Requirements

- Java JDK version 11 or higher is required.
- JAVA\_HOME environment variable must be set.
- Add %JAVA\_HOME%\bin to your PATH.
- Internet access to reach Okta endpoints.

## Installation Steps

1. Download and run the AuthGate installer.
2. AuthGate will install to 'C:\Program Files\AuthGate'.
3. A desktop shortcut named 'okta-gui-client' will be created.

AuthGate

## Using AuthGate

1. Double-click the desktop shortcut.
2. Enter the following fields:
  - Okta Org URL: (e.g., <https://trial-3252174.okta.com>)
  - Okta API Token
  - Email OR Group name (only one should be filled)
3. Click 'Fetch & Export PDF' to retrieve users and generate a report.

Note: You can only use either an email or a group, not both.
